Genially

If you haven't heard of Genially, it's time to get excited! This cool tool will jazz up your presentations, infographics, images, and games by making them interactive. You can choose from thousands of templates or create your own. This will work well with all content areas. If you are looking for a way to motivate and engage your students, this could be the magic solution you've been searching for! What's even better is Genially can be worked on collaboratively and integrates with Canvas AND Google Classroom!

The possibilities are endless! Check out this brief video to see an example of how to create an interactive image!

Visit genially.ly to get started now!
